

- Enter the tax year in the box above.
- **Include a completed copy of this schedule with the trust's return.**
- The cumulative net investment loss (CNIL) is the trust's total investment expenses for years ending after 1987, minus the trust's total investment income for years ending after 1987. For purposes of the CNIL, investment income and expenses generally mean income and expenses for property including dividends, interest, rental income, and royalties.
- Complete this schedule if the trust is a personal trust that has qualified farm or fishing property or qualified small business corporation shares, is reporting any investment income, or claiming any investment expenses, and is :
 - designating taxable capital gains from qualified farm or fishing property, qualified small business corporation shares, or reserves on these properties to an individual beneficiary.
- Trusts with qualified farm or fishing property or qualified small business corporation shares should complete this schedule each year and keep it with the trust's records. Do this even for years when the trust is not reporting capital gains or losses, and is not designating eligible taxable capital gains to its beneficiaries. The balance in the trust's CNIL account is a cumulative total. You need the total of the trust's investment income and expenses for 1988 and later years to calculate eligible taxable capital gains on Schedule 3, Eligible Taxable Capital Gains.
- The CNIL calculated on line 28 of this schedule will reduce the trust's cumulative gains limit calculated on Schedule 3. This may reduce the trust's eligible taxable capital gains that qualify for the capital gains deduction.
