T4032-QC, Payroll Deductions Tables – EI, and income tax deductions – Quebec

Effective
January 1, 2022
What’s new as of January 1, 2022

The major changes made to this guide since the last edition are outlined.

This guide reflects some income tax changes recently announced which, if enacted as proposed, would be effective January 1, 2022. At the time of publishing, some of these proposed changes were not law. We recommend that you use the new payroll deductions tables in this guide for withholding starting with the first payroll in January 2022.

For 2022, employers can use a Federal Basic Personal Amount (BPAF) of $14,398 for all employees.

The federal income tax thresholds have been indexed for 2022.

The federal Canada Employment Amount has been indexed to $1,287 for 2022.

Payroll Deductions Tables

You can download Guides T4008, Payroll Deductions Supplementary Tables, and T4032, Payroll Deductions Tables, from our webpage at canada.ca/payroll. You can also choose to print only the pages or information that you need. This guide calculates the deductions tables using the dynamic federal basic personal amount formula and the dynamic provincial/territorial basic personal amount formulas where required.

Payroll Deductions Online Calculator

For your 2022 payroll deductions, you can use our Payroll Deductions Online Calculator (PDOC). The online calculator makes it easier to calculate payroll deductions. PDOC is available at canada.ca/pdoc.

PDOC calculates your payroll deductions. It calculates deductions for any pay period, province (except Quebec) and territory. The calculation is based on exact salary figures.

Let us notify you

We provide a digital service that can notify you immediately, free of charge, of any changes for payroll deductions.

To subscribe, visit our webpage at canada.ca/cra-email-lists and enter your business’s email address for each mailing list that you want to join.

Special Notice

Payroll Deductions Tables (T4032)

Effective with the January 1, 2017 edition, the Canada Revenue Agency is no longer publishing the paper and CD versions of the Guide T4032, Payroll Deductions Tables. The digital versions of the guide continue to be available on our website at canada.ca/payroll.

Who should use this guide?
This guide is intended for the employer and the payer. It contains tables for federal and provincial tax deductions, CPP contributions and EI premiums. It will help you determine the payroll deductions for your employees or pensioners.

For information on deducting, remitting, and reporting payroll deductions, see the following employers’ guides:

- T4001, Employers’ Guide – Payroll Deductions and Remittances
- T4130, Employers’ Guide – Taxable Benefits and Allowances
- RC4110, Employee or Self-employed?
- RC4120, Employers’ Guide – Filing the T4 Slip and Summary
- RC4157, Deducting Income Tax on Pension and Other Income, and Filing the T4A Slip and Summary

These guides are available on our website at canada.ca/taxes.

Note
You may want to refer to the 2021 edition of Payroll Deductions Tables until the end of 2022 to resolve any pensionable and insurable earnings review (PIER) deficiencies that we identify in processing your 2021 T4 return.

What if your pay period is not in this guide?
This guide contains the most common pay periods: weekly, biweekly (every two weeks), semi-monthly, and monthly. If you have unusual pay periods, such as daily (240 working days), or 10, 13, or 22 pay periods a year, see the Guide T4008, Payroll Deductions Supplementary Tables, or the Payroll Deductions Online Calculator (PDOC) to determine tax deductions.

Which provincial or territorial tax table should you use?
Before you decide which tax table to use, you have to determine your employee’s province or territory of employment. This depends on whether or not you require the employee to report for work at your place of business.

If the employee reports for work at your place of business, the province or territory of employment is considered to be the province or territory where your business is located. To withhold payroll deductions, use the tax table for that province or territory of employment.

If you do not require the employee to report for work at your place of business, the province or territory of employment is the province or territory in which your business is located and from which you pay your employee’s salary.

For more information and examples, see Chapter 1, “General Information” in Guide T4001, Employers’ Guide – Payroll Deductions and Remittances.

Federal tax for 2022
Indexing for 2022
For 2022, the federal income thresholds, the personal amounts, and the Canada employment amount have been changed based on changes in the consumer price index.

The federal indexing factor for January 1, 2022 is 2.4%. The tax credits corresponding to the claim codes in the tables have been indexed accordingly. Employees will automatically receive the indexing increase, whether or not they file Form TD1, 2022 Personal Tax Credits Return.
Tax rates and income thresholds
For 2022, the federal tax rates and income thresholds are:

### Chart 1 – 2022 federal tax rates and income thresholds

<table>
<thead>
<tr>
<th>Annual taxable income ($)</th>
<th>Federal tax rate (%)</th>
<th>Constant ($)</th>
</tr>
</thead>
<tbody>
<tr>
<td>From – To</td>
<td>R</td>
<td>K</td>
</tr>
<tr>
<td>0.00 to 50,197.00</td>
<td>15%</td>
<td>0</td>
</tr>
<tr>
<td>50,197.01 to 100,392.00</td>
<td>20.5%</td>
<td>2,761</td>
</tr>
<tr>
<td>100,392.01 to 155,625.00</td>
<td>26%</td>
<td>8,282</td>
</tr>
<tr>
<td>155,625.01 to 221,708.00</td>
<td>29%</td>
<td>12,951</td>
</tr>
<tr>
<td>221,708.01 and over</td>
<td>33%</td>
<td>21,819</td>
</tr>
</tbody>
</table>

### Canada Employment Amount

The non-refundable Canada employment amount is built into the federal payroll deductions tables. The federal Canada employment amount is the lesser of:
- $1,287 and
- the individual’s employment income for the year

The maximum annual non-refundable tax credit is $193.05.

Pension income is not eligible for this credit. If you are paying pension income, use the Payroll Deductions Online Calculator to find the tax deduction.

### Personal amounts

The federal personal amounts for 2022 are:
- Basic personal amount (maximum) ................................................................. $14,398
- Basic personal amount (minimum) ................................................................. $12,719

For more detailed information on the personal amounts, go to Form TD1.

### Employment Insurance (EI) premiums for 2022

#### Quebec Parental Insurance Plan

This plan replaces and enhances the measures provided to new parents under the Employment Insurance program administered by Employment and Social Development Canada (ESDC).

The Canada Revenue Agency (CRA) administers the requirements relating to Employment Insurance (EI) premiums. The Quebec Parental Insurance Plan (QPIP) references in this guide are only for clarifying EI requirements. All QPIP requirements should be confirmed with Revenu Québec, which administers the provincial plan.

Employers will use the EI rate corresponding to the province of employment. A reduced EI rate applies when the province of employment is Quebec and the regular EI rate applies when the province of employment is other than Quebec.

For more information on province of employment, refer to the section “Which provincial or territorial tax table should you use?”

Employers who have employees working in Quebec will use an EI deduction table specific to employees in Quebec. The deductions, remittances, reporting and the applicable new non-refundable tax credit will be based on the reduced EI rate. Employers should also track the QPIP information for T4 reporting.

The EI maximum insurable earnings will remain the same for all provinces and territories and will continue to be set by the federal government.
**Employee premiums**
You withhold EI premiums beginning with the first dollar of insurable earnings. You stop deducting premiums when you reach the employee’s maximum annual insurable earnings.

When you use the table in this guide to determine the EI premiums, look up the insurable earnings for the period, not the gross remuneration.

<table>
<thead>
<tr>
<th>Employment Insurance Premiums</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum annual insurable earnings</td>
</tr>
<tr>
<td>Premium rate in Quebec only (%)</td>
</tr>
<tr>
<td>Maximum annual employee premium in Quebec</td>
</tr>
</tbody>
</table>

You stop deducting EI when the employee reaches the maximum annual premium.

**Note**
As an employer, you have to remit these deductions along with your share of EI premiums.

<table>
<thead>
<tr>
<th>Quebec Parental Insurance Premium</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum annual insurable QPIP earnings</td>
</tr>
<tr>
<td>QPIP premium rate (%)</td>
</tr>
<tr>
<td>Maximum annual employee QPIP premium in Quebec</td>
</tr>
</tbody>
</table>

**Note**
QPIP premiums and the related employer portion are paid to Revenu Québec, not to the Canada Revenue Agency.

**Changes to reporting**

**New fields to be kept for payroll records and reported on the T4 slip**
These reporting changes are province dependent. For now, these fields will only be filled when the province of employment is Quebec.

The T4 slip will have new fields for the three data elements that must be saved and reported. They are:
- Provincial Parental Insurance Plan (PPIP) premium;
- PPIP insurable earnings; and
- PPIP exempt code (leave blank – no exemptions for the first year).

The names are generic to accommodate future plans. The province of employment will be the key to applying the appropriate EI rate and maximum premium.

The QPIP fields will be reported on the T4 slip in the new PPIP premiums and insurable earnings boxes, located below the existing fixed boxes 52 and 50. The new numeric codes are box 55 for PPIP premiums and box 56 for PPIP insurable earnings. The new PPIP exempt code box will be created next to the CPP/QPP and EI exempt boxes as part of box 28.

**Note**
For all information on QPIP regarding the implementation, administration, rates, maximum insurable earnings, payments of benefits or how to complete the Quebec information slips, visit the Revenu Québec website at revenu.gouv.qc.ca.

**Deducting and remitting obligations for Employment Insurance (EI)**
The EI deductions will decrease for employees working in Quebec, but the method of remitting to the Canada Revenue Agency does not change.

It is possible that some employers’ federal remittance frequency could change if the reduction of EI for Quebec employees changes the threshold for the employer, however this is unlikely for large employers.

For information on how and when to remit QPIP premiums, visit the Revenu Québec website at revenu.gouv.qc.ca.
When an employee changes province of employment with the same employer during the year, the maximum premium for the year will vary based on the province where the first $60,300 of insurable earnings are paid.

**Example**
- An employee makes $30,000 of insurable earnings in Ontario
- The same employee changes his province of employment to Quebec and makes an additional $40,000 with the same employer. The employee’s maximum premium is calculated as follows:

<table>
<thead>
<tr>
<th>Location</th>
<th>Earnings</th>
<th>Maximum Premium</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ontario</td>
<td>$30,000</td>
<td>$474.00</td>
</tr>
<tr>
<td>Quebec</td>
<td>$30,300</td>
<td>$363.60</td>
</tr>
<tr>
<td><strong>Totals</strong></td>
<td><strong>$60,300</strong></td>
<td><strong>$837.60</strong></td>
</tr>
</tbody>
</table>

Canada Revenue Agency and Revenu Québec will reconcile adjustments to EI and QPIP premiums for trans-border employees. It is anticipated that adjustments between the EI and QPIP deductions will be resolved through the filing of the income tax return and an annual year-end adjustment process.

For detailed information concerning federal requirements, refer to the CRA payroll webpage at [canada.ca/payroll](http://canada.ca/payroll).

**Quebec tax abatement**

The Quebec tax abatement rate remains at 16.5% for 2022.

**Personal tax credits return (TD1 form)**

You may have to ask your employees or your pensioners to complete a federal personal tax credits return using a federal Form TD1.

For more information, see Chapter 5, “Deducting income tax” in Guide T4001, Employers’ Guide – Payroll Deductions and Remittances.

**Claim codes**

The total personal amount an employee claims on a TD1 form will determine which claim code you will use. See Chart 2.

**Explanation of claim codes**

**Claim code 0**

This code represents no claim amount. This code may also be used if the employee indicated they have more than one employer or payer at the same time and have entered “0” on the front page of Form TD1 for 2022.

**Claim codes 1 to 10**

The claim code amounts do not appear on either the federal or the provincial TD1 form.

You match the “Total claim amount” reported on your employee’s or pensioner’s TD1 form with the appropriate claim codes. Then, you look up the tax for the employee’s pay under the claim code in the federal tax tables for the pay period.

**Indexing of federal claim codes amounts**

The credits that apply to each federal claim code have been automatically increased in the tax tables by the indexing factor for the current year. If your employee did not complete the federal and provincial TD1 forms for 2022, you continue to deduct income tax using the same claim code that you used last year.
Calculating payroll deductions for employees in the hotel and restaurant business in Quebec

As a result of legislation introduced in the province of Quebec, employees in the hotel and restaurant business who receive income from tips and gratuities have to declare this income to their employers. Effective January 1, 1998, you have to include tips declared by these employees when you calculate insurable earnings for purposes of Employment Insurance (EI). You also have to include these tips when you determine federal income tax deductions. Report the tips and deductions on a T4 slip.

When you include the declared tips and gratuities in the income, the corresponding deductions shown in the Payroll Deductions Tables may be greater than the cash salary or wages paid. Payroll deductions cannot be more than the amount of salary and wages paid. To make sure that the deductions are not more than the salary or wages, you will have to reduce the deductions until net pay is no longer negative.

How do you reduce the deductions?

When you reduce the payroll deductions, you have to reduce them in a particular order, as specified in the Quebec legislation. First reduce the Quebec provincial tax, and then reduce Quebec Parental Insurance Premiums and finally Quebec Pension Plan (QPP) contributions. If the net pay is still negative, reduce the federal tax withholding. Any shortfall of federal or provincial tax will be determined when the individuals file their personal tax returns.

In some cases, when QPP is reduced, you may have to increase federal tax to reflect the change in the federal tax credit for QPIP and QPP contributions. You can use the Payroll Deductions Online Calculator (PDOC) to determine the adjusted deductions.

Form TD1X, Statement of Commission Income and Expenses for Payroll Tax Deductions

If your employees want you to adjust their tax deductions to allow for commission expenses, they have to complete Form TD1X, Statement of Commission Income and Expenses for Payroll Tax Deductions.

You deduct tax from your employees’ commission pay using the “Total claim amount” on their TD1 forms in the following situations:

- if your employees do not complete a Form TD1X or
- if they tell you in writing that they want to cancel a previously completed Form TD1X

How to use the tables in this guide

Use the tables in this guide to determine the EI premiums and federal tax that you will deduct from your employees’ remuneration.
**EI table (Section B)**

- Find the page in Section B that corresponds to the “Insurable earnings” of your employee.
- To find the range that includes your employee’s insurable earnings, look down the “Insurable earnings” column. When you use the table in this guide to determine the EI premiums, look up the insurable earnings for the period not the gross remuneration.
- In the column next to the “Insurable earnings” column, you will find the EI premium that you should withhold from your employee’s pay.

**Federal tax deductions tables (Section C)**

Even if the period of employment for which you pay a salary is less than a full pay period, you must continue to use the tax deductions table that corresponds to your regular pay period.

- Find the pages in Section C that correspond to your pay period.
- To find the range that corresponds to your employee’s taxable income (this includes any taxable benefits), look down the “Pay” column.
- In the row under the applicable claim code, you will find the amount of federal tax that you should withhold from your employee’s pay (for more information, see the section called “Claim codes” and Chart 2).

**Additional information about payroll deductions**

**Deducting tax from income not subject to CPP contributions or EI premiums**

We have built the tax credits for CPP contributions and EI premiums into the federal and provincial tax deductions tables in this guide. However, certain types of income, such as pension income, are not subject to CPP contributions and EI premiums. As a result, you will have to adjust the amount of federal and provincial income tax you are deducting.

To determine the amount of tax to deduct from income not subject to CPP contributions or EI premiums, use the Payroll Deductions Online Calculator, available at canada.ca/pdoc. On the “Salary pay calculation” and/or on the “Commission pay calculation” screen, go to Step 3 and select the “CPP Exempt” and/or “EI Exempt” option before clicking on the “Calculate” button.

**Step-by-step calculation of tax deductions**

You can use the following step-by-step calculations to calculate the tax deductions for any employee or pensioner who earns more than the maximum amounts included in the tax deductions tables.

The example shows you how to determine the amount of tax to deduct from all income.

However, if you design your own payroll program or spreadsheets to calculate tax deductions, do not use either of these calculations. Instead, see Guide T4127, Payroll Deductions Formulas.

**Example**

**Tax to deduct for all income**

This example applies to a person who earns $1,400 weekly and contributes $80 to a registered retirement savings plan (RRSP).

This person claims the basic personal claim amount.

**Calculate annual taxable income**

<table>
<thead>
<tr>
<th>Description</th>
<th>Sub-amounts</th>
