

Statistics Division

Statistics Division

The Statistics Division is a “service-first” client-driven provider of decision tools, products and services to help you plan, control, improve and measure your operations.

We capture, analyze and produce statistics in all business lines of the Agency including individual and corporation tax, customs, excise, GST/HST, trade and benefits. The statistical data is used for many purposes including fiscal, tax and socio-economic policy development by federal, provincial, territorial, and municipal government departments and agencies, and by other parts of the public sector and by the private sector.

We research and develop mathematical models to support the administration of a wide array of acts, regulations, and incentives such as the *Income Tax Act*, the *Excise Tax Act*, the *Excise Act*, the *Special Import Measures Act*, the *Customs Act*, and the federal, provincial and territorial child tax benefits and allowances.

We also determine, in conjunction with other departments, agencies, and governments, the key statistical data they need for their policy and program decisions while ensuring that taxfiler confidentiality provisions are respected.

Our Products in General

- Statistics and mathematical models to support program decisions for customs, excise, GST/HST, trade, benefit, tax and for fiscal socio-economic policy development and budget formulation
- Statistical data and analysis in support of Canada Customs and Revenue Agency (CCRA) programs (e.g., taxpayer compliance, charities, and child benefits)
- Design and development of specialized statistical information systems, programs, and databases
- Simulations and other decision support tools for planning, policy formulation, and program decisions

- Performance measures and measurement systems
- Impact analysis and evaluation studies
- **Customized service packages to suit your needs**
